

Lightbulbs (Lamps)

Special FX Lighting Color Coats LED Light Bulbs (Lamps)

Many types and styles of LED light bulbs can be color coated with Special FX Lighting's FadeNot color coating.

Most applications requested are to control color temperature, lumen output, or both. Color coating LED lamps can improve ambiance in restaurants, bars, office lobbies and other public gathering spaces. We can also apply any color to the lamps. We can color coat supplied lamps, or supply finished products.

Specify: Product code or detail of lamp. **Specify:** Our finished lamp or your supplied lamp.

Color: Any color or combination of colors from any theatrical or dichroic color media can be specified. We can match provided color samples. We can match specified kelvin shift color corrections. To aid in color decision making, Special FX recommends mocking up with color.

The Amazing Rainbow Light

Exempt from the GSL Enforcement policy, The Amazing Rainbow Light is available in three color combinations: The Original Rainbow in Blue, Yellow, and Red; Pastel in Blue, Pink, and Purple; Mardi Gras in Purple, Green, and Yellow. Use in lamps or sconces where a colorful effect is desired. The Amazing Rainbow Light is sold only to authorized distributors.

Order Lead-time Average order lead-time for customer supplied lamps is four weeks from receipt of material. Average order lead time for supplied lamps is six weeks from receipt of Purchase Order. Exact lead times can be provided upon order receipt.
